Prepared by the Trade Analysis Branch, Commercial Agriculture Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Joel L. Greene and Mary L. Fant. Ms. Fant also provides word processing and table formatting support. Editorial support is furnished by Martha R. Evans, Publishing and Communications Branch, Information Services Division, Economic Research Service. Data processing support is provided by Kenneth King, Information Technology Services, Information Services Division.

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-2791.

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, DC 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.

For additional information about ERS publications, databases, and other products, both paper and electronic, visit the **ERS Home Page** on the Internet at <http://www.econ.ag.gov/>

## Digest

**Agricultural Exports Continue Strong Advance** (see p. 2)--U.S. agricultural exports totaled nearly \$32 billion for the first 6 months of fiscal 1996, 13 percent more than during the same period in fiscal 1995. The strong export performance is due to the increased value of bulk commodity sales and steady high-value products (HVP). Bulk exports totaled \$15.9 billion, and HVP exports were \$16.1 billion. Exports were particularly strong to Asian markets, and exports to Mexico began to recover from the decline in 1995.

**Agricultural Imports Ahead of Fiscal 1995** (see p. 6)--U.S. agricultural imports rose 6 percent to \$15.7 billion during October 1995-March 1996. Most of the increase was due to large gains in cocoa, grain and feeds, vegetable oils, and horticultural products. However, these gains were offset somewhat by lower imports of beef and coffee, two of the largest import items.

**Import Share of Food Consumption in 1994** (see p. 7)--The import share of food consumption reflects changing domestic supplies, relative prices for imported commodities, and changing consumer tastes and preferences. Compared with 1993, 34 of the 76 agricultural food imports included in the analysis had lower import shares of consumption in 1994, 33 had higher shares, and nine were unchanged.

**California U.S. Agricultural Export Leader in Fiscal 1995** (see p.10)--In fiscal 1995, the United States exported \$54.2 billion worth of agricultural commodities, nearly \$11 billion more than the previous year, and for the 11th consecutive year, California was the top exporter. Iowa was second, followed by Illinois, Texas, Nebraska, Kansas, Minnesota, Washington, Indiana, and Arkansas. The 10 top States accounted for 58 percent of total U.S. agricultural exports, unchanged from last year. In addition to the top 10 States, Florida, Georgia, Missouri, North Carolina, North Dakota, Ohio, South Dakota, and Wisconsin shipped over \$1 billion worth of commodities.

## Note to Subscribers

The Economic Research Service (ERS) will publish the Foreign Agricultural Trade of the United States (FATUS) quarterly, instead of bimonthly, and fiscal and calendar year supplements. The data published in the January/February/March issue will include calendar year totals; the April/May/June issue, data from the first 6 months of the fiscal year; the July/August/September issue, 9 months of fiscal year data; and the October/November/December issue will include fiscal year totals.

The export and import data files (tables A-2 and B-3 in the FATUS publication) are available each month on the CALL-ERS/NASS electronic bulletin board. Set your communications software to 9600 (or lower) baud, N-8-1, and dial 1-800-821-6229, or 1-202-219-0377 to access the bulletin board. Log on as a new user and follow the instructions. The tables are self extracting archives which are decompressed by typing the file name at the command prompt. The data files are available on ERS's homepage on the Internet. The Internet address is <http://www.econ.ag.gov/>. The files are located under Electronic Publications-Situation and Outlook Reports-U.S. Agricultural Trade.

ERS plans to phase out the printed issues of FATUS and merge FATUS and U.S. Agricultural Trade Update into a single subscription in 1997. Subscribers will receive the monthly newsletter, and have electronic monthly access to the FATUS data files, and the fiscal and calendar year supplements. Special articles, such as State export shares and export share of production, will be summarized in the monthly Update and made available electronically.

## Agricultural Exports Continue Strong Advance

U.S. agricultural exports totaled nearly \$32 billion for the first 6 months of fiscal 1996, 13 percent more than during the same period in fiscal 1995. The strong export performance is due to the increased value of bulk commodity sales and steady high-value products (HVP). Bulk exports totaled \$15.9 billion, and HVP exports were \$16.1 billion. Exports were particularly strong to Asian markets, and exports to Mexico began to recover from the decline in 1995.

### Bulk Export Value Surges

During October 1995-March 1996, the United States shipped 68 million tons of bulk commodities, only 1 million tons more than a year earlier, but export value surged 26 percent to \$15.9 billion. Lower production in marketing year 1995/96 and strong foreign demand for bulk commodities tightened supplies and sharply raised prices for wheat, corn, and soybeans. In many markets, export value for wheat, corn, and soybeans increased even as volume declined.

Wheat shipments during October 1995-March 1996 increased 2 percent to 16.8 million tons, but value jumped 39 percent to \$3.4 billion because of the higher prices. Egypt was the leading market for U.S. wheat at 2.7 million tons, but was 17 percent lower than a year earlier. Sales to Latin America rose 47 percent to 2.7 million tons on gains to Mexico, Peru, and Brazil. Exports to Southeast Asia rose 39 percent to 1.7 million tons, with sales especially strong to Indonesia.

U.S. corn exports increased 6 percent to 30.1 million tons, but value rose 46 percent to \$4.4 billion. Exports to Southeast Asia were 1.8 million tons, more than triple a year earlier as the United States supplied markets normally supplied by China. Drought conditions led to increased shipments to Mexico, up 47 percent to 2.7 million, and boosted exports to South Africa to 339,000 tons, compared with 29,000 a year earlier.

Soybean shipments dipped 2 percent to 14.6 million tons, but value was 22 percent higher at nearly \$4 billion. U.S. shipments to the EU-15 declined 12 percent to 6.7 million tons, and were unchanged to Japan and Taiwan. But exports to Southeast Asia jumped 81 percent to 1.1 million tons, and shipments to Mexico rose 69 percent to 1.1 million tons.

## HVP Exports Slow in 1996

HVP exports increased 2 percent to \$16.1 billion, a considerably slower growth rate than in recent years. Through March 1996, HVP exports accounted for just over 50 percent of all agricultural exports, down from 55 percent in 1995 and 58 percent in 1994. Slower HVP growth was due to reduced exports of intermediate goods, such as hides and skins, animal fats and oils, and soybean oil. Lower prices for cattle hides reduced the value of exports, and there was less demand for both animal fats and soybean oil.

HVP exports advanced on gains in red meat and poultry meat. Red meat exports rose 17 percent to \$2.4 billion, with beef rising 15 percent to \$1.4 billion. Japan was the leading market for beef at \$878 million, a 22-percent increase from a year earlier. Exports to South Korea rose 24 percent to \$160 million, but declined 5 percent to Canada at \$174 million. Poultry meat exports rose 28 percent to \$1.2 billion. Leading the poultry meat surge were exports to Russia which jumped 100 percent to \$430 million, while exports to Hong Kong, the second leading market, remained flat.

After rising almost 12 percent in fiscal 1995 compared with 1994, horticultural exports in fiscal 1996 slowed during the first half of fiscal 1996. Compared with the first half of fiscal 1995, fruit, including juice, increased 2 percent to \$1.6 billion, and nut and preparation exports were 8 percent higher at \$857 million on increased walnut, pistachio, and almond exports. Wine exports were up a strong 40 percent to \$125 million.

Most of the slowdown in horticultural exports was due to lower vegetable exports, particularly fresh vegetables. Fresh vegetable exports declined 18 percent to \$454 million on smaller volume at lower prices. The export price for fresh vegetables was \$565 per ton, compared with \$639 per ton in 1995. Exports to Canada, the largest market for fresh vegetables, were down 18 percent to \$311 million, even though volume was unchanged from last year. Exports to Japan were down 23 percent to \$79 million, mainly due to sharply lower onion exports.

### Asia Leading Market

U.S. exports to markets in Asia reached \$13.9 billion, 16 percent higher than a year earlier. Since Asian markets are leading destinations for U.S. bulk commodities, export growth was especially strong

during the first 6 months of fiscal 1996. The fastest growing market was Southeast Asia, with exports of \$2 billion, 49 percent higher than a year earlier. Exports increased 19 percent to \$6 billion to Japan, gained 14 percent to nearly \$2 billion to South Korea, and rose 13 percent to \$1.4 billion to Taiwan.

Exports to Mexico were 19 percent higher at \$2.3 billion compared with 1995. HVP exports were still below year ago levels. However, second quarter shipments of many HVP commodities surpassed last year, an indication that HVP export prospects have improved. (Joel Greene, Trade and Analysis Branch, 202-219-0816)

Table 1--Agricultural, nonagricultural, and total trade balance of exports and imports

Item	October-March		March	
	1994/95	1995/96	1995	1996

## Agricultural Imports Ahead of Fiscal 1995

U.S. agricultural imports rose 6 percent to \$15.7 billion during October 1995-March 1996. Most of the increase was due to large gains in cocoa, grain and feeds, vegetable oils, and horticultural products. However, these gains were offset somewhat by lower imports of beef and coffee, two of the largest import items.

U.S. cocoa imports rose 42 percent to 453,000 tons, and value increased 30 percent to \$738 million. Increased cocoa production lowered import prices 8 percent compared with a year ago. Cocoa imports from the Ivory Coast jumped more than 100 percent to \$211 million, and imports from Indonesia and Ecuador were also up sharply to \$72 million and \$45 million, respectively. Imports from Brazil, a leading supplier, were lower due to production shortages caused by disease problems.

Imports of grain and feed increased 10 percent to \$1.2 billion. The grain component only advanced 3 percent to \$331 million as import volume for wheat, rice, and coarse grains fell 24 percent to 1.9 million tons. On the other hand, grain products and animal feeds rose 13 percent to \$991 million because of higher prices for grain and feed products.

Vegetable oil imports rose 17 percent to \$782 million. Increased coconut, olive, rapeseed, and soybean oil imports accounted for most of the gain. Import volume only increased 3 percent to 814,000 tons. Higher import prices boosted value, especially for olive oil.

U.S. horticultural imports advanced 8 percent to \$7.3 billion. Fruit imports rose nearly 8 percent to \$1.8 billion, as gains in pears, apples, and mangoes boosted fresh fruit imports. Banana imports increased more slowly at 3 percent to \$558 million. Fruit juice imports jumped from 253,000 hectoliters

to 928,000 hectoliters, led by large increases in grape juice imports from Argentina and Chile.

Vegetable imports rose only 2 percent to \$1.7 billion, even though import volume jumped 28 percent to 2.3 million tons. Fresh vegetable volume accounts for most import volume and was up 33 percent. Prices for most fresh vegetables declined compared with last year, limiting value gains. Imports from Canada jumped 47 percent to \$164 million because of a sharp rise in potato imports, up 78 percent to \$113 million. Tomato imports rose 17 percent to \$290 million and volume jumped 34 percent to 420,000 tons on increased imports from Mexico.

Beer and wine imports jumped 16 percent to \$1.2 billion and volume increased 11 percent to 7.8 million hectoliters. Most of the gain was from the EU-15, but wine imports were also up from Australia and Chile. Beer imports gained from the EU-15, Mexico, and Canada.

Coffee imports declined 16 percent to \$1.5 billion, even though volume rose 21 percent to nearly 600,000 tons. Coffee import prices, at \$2,600 per ton, were 31 percent lower than a year earlier. In fiscal 1995, coffee import prices averaged nearly \$3,600 per ton because of frosts in Brazil, but have steadily declined during 1996, as world production recovered.

Beef imports fell 17 percent to \$649 million on lower volume and lower prices. Imports from Australia were 31 percent lower at 89,000 tons and value fell to \$149 million. Canada gained as shipments rose 22 percent to 104,000 tons, but lower prices limited value to an 11-percent gain to \$202 million. High U.S. supplies and low prices discouraged beef imports. (*Joel Greene, Trade and Analysis Branch, 202-219-0816*)

## Import Share of Food Consumption in 1994

The import share of food consumption reflects changing domestic supplies, relative prices for imported commodities, and changing consumer tastes and preferences. Compared with 1993, 34 of the 76 agricultural food imports included in the analysis had lower import shares of consumption in 1994, 33 had higher shares, and nine were unchanged.

The import share of food consumption shows how much of the U.S. food supply is produced domestically and what portion comes from other countries. It is both an indicator of U.S. dependence on other countries for certain food items and a measure of the diversity of our diet. In some cases, the seasonality of certain vegetables and fruits are no longer a constraint to consumption as imports maintain the supply during the domestic off-season. Tropical products such as tea, cocoa, palm oils, and other products not produced in the United States, have an import share of consumption of 100 percent. Most food products are both produced domestically and imported.

### Methodology

Table 8 shows the import share of consumption for various commodities. Import shares are calculated by dividing the quantity imported by food disappearance. Imports not consumed as food may overstate import share. For instance, imported grains may be used as feed rather than in food products. However, the import share of consumption is underestimated to the extent that some commodities are imported as components of processed products, such as the pasta or meat contained in prepared dinners. Also, sweeteners in baked, frozen, or other foods are not included in sweetener imports.

### Animal Product Imports

The import share for red meat consumption declined from 7.6 in 1993 to 7.3 in 1994. This resulted from increased consumption and a slight decrease in imports. Beef and pork import shares declined, while the share of lamb imports increased. Less beef was imported from Australia and New Zealand and less pork from Eastern Europe.

The import share of dairy products changed little in 1994. Dairy product production increased and butter stock drawdowns accommodated increased consumption.

### Grain Imports

Major grain imports declined somewhat from the highs of 1993. Import shares declined for wheat, corn, and oats. The greatest 1994 declines in import share were in rye and barley. While rye consumption was unchanged, imports declined. Barley consumption increased as imports from Canada declined. Decreased barley production was offset by stock drawdowns. The import share for rice increased as imports outpaced consumption.

### Horticultural Imports

The import share for fresh vegetables was up only slightly in 1994. The greatest movement was in brussel sprouts, garlic, and asparagus. Garlic imports from China were sharply reduced compared with 1993. Onions, tomatoes, and peppers, which rank much higher in consumption, have relatively stable import shares.

Changes in the import share of vegetables for processing were more striking than those for fresh vegetables. The import share of asparagus for processing dropped sharply, from 33 to 10 percent. Imports were down by half as consumption declined. The import share of cauliflower was up sharply. Imports of cauliflower were up sharply in the face of declining consumption.

The import share of peas and lentils increased because of a near doubling of imports accompanying sharply increased consumption.

The fruit import share of consumption rose slightly in 1994, reflecting higher imports, particularly citrus and grapes. This continues a longer term upward trend in the import share of fresh fruit consumption. Declining consumption also contributed to the rising import share.

### Other Imports

The share of imports in cane and beet sugar consumption moved lower, continuing a nineties downward trend for these products. The share of imports in salad and cooking oils moved up slightly continuing a long-term upward trend. The import share for peanuts increased. Peanut consumption includes peanut oil, and peanut oil imports from Argentina increased sharply. (*Ray Nightingale, Trade Analysis Branch, 202-501-8519*)

Table 5--Import share of food supply for domestic consumption by commodity for selected years

-- Less than 0.05 percent.

NA = Not available.

Data on import share of consumption is available for 1992 in the USDA publication "Food Consumption, Prices, and Expenditures 1970-94," December 1995. However, the data in the table 6 for vegetable oils were calculated from data published in the 1995 Oil Crops Situation and Outlook Yearbook.

1/ Excludes game fish consumption.

2/ Includes cultivated catfish.

3/ Excludes the nonfish content of canned fishery products.

4/ Milk equivalent of all dairy products calculated on a milkfat basis.

5/ Natural equivalent of cheese and cheese products. Includes all type of cheese except full-skim American, and cottage, pot, and baker's cheeses.

6/ Olive oil imports.

7/ Includes palm kernel oil, palm oil, and coconut oil.

8/ Includes almonds,

9/ Includes apricots, avocados, cherries, cranberries, nectarines, peaches, pears, pineapples, plums, prunes, strawberries, papayas, and miscellaneous fruits.

10/ Flour and other wheat products included, grain equivalent.

11/ Includes flour equivalent of macaroni products.

12/ Kona coffee, grown in Hawaii, accounts for about 0.1-0.2 percent of total U.S. coffee consumption.

## California U.S. Agricultural Export Leader in Fiscal 1995

In fiscal 1995, the United States exported \$54.2 billion worth of agricultural commodities, nearly \$11 billion more than the previous year, and for the 11th consecutive year, California was the top exporter. Iowa was second, followed by Illinois, Texas, Nebraska, Kansas, Minnesota, Washington, Indiana, and Arkansas. The top 10 States accounted for 58 percent of total U.S. agricultural exports, unchanged from last year. In addition to the top 10 States, Florida, Georgia, Missouri, North Carolina, North Dakota, Ohio, South Dakota, and Wisconsin shipped over \$1 billion worth of commodities.

In fiscal 1995, States that produced a large portion of U.S. grains and soybeans showed strong export gains as total shipments rose from 90 million tons in 1994 to more than 125 million tons in 1995. The value of bulk exports (including cotton and tobacco) jumped 37 percent to \$24.1 billion in 1995. Crop production recovered in many States in 1994 after the flood-reduced levels of 1993, boosting export shares. High-value product (HVP) exports increased 16 percent to \$30.1 billion due to increases in red meat and poultry, and to a lesser extent, gains in fruit, nut, and vegetable exports. States that produce livestock products had significant gains in export share.

California's estimated exports increased nearly 10 percent to a record \$7.1 billion in fiscal 1995 because of increased cotton and horticultural exports. California's share of total U.S. agricultural exports slipped to 13 percent from almost 15 percent in 1994. Fruit, tree nuts, and vegetables accounted for 65 percent or \$4.6 billion of California's total exports, and the State was by far the leading exporter of these horticultural commodities. California was also the leading exporter of seeds (\$121 million), and ranked second in cotton, cottonseed, dairy, and rice exports.

Increased shipments of feed grains and soybeans propelled Iowa back into the second position in 1995 after a sharp decline in exports in fiscal 1994. Iowa's exports rebounded 69 percent to almost \$4 billion, and the State was the leading exporter of feed grains (\$1.6 billion) and soybeans (\$1.3 billion). Illinois was the third leading exporter with estimated exports of slightly more than \$3.4 billion. Illinois was the second leading exporter of feed grains (\$1.5 billion) and soybeans (\$1.2 billion).

Estimated exports for Texas increased 14 percent to nearly \$3.4 billion because of strong global demand for U.S. cotton and livestock products in 1995. The value of Texas' livestock and meat, hides and skins, and fats and oils rose 22 percent to \$1.2 billion, and cotton export value rose 19 percent to \$880 million. Texas was the leading U.S. exporter of cotton and cottonseed and products (\$42 million). Nebraska followed Texas with exports of \$3.2 billion, a 29-percent gain compared with 1994. Nebraska was the leading exporter of livestock and meat products (\$764 million), feeds and fodders (\$208 million), and fats, oils, and greases (\$148 million).

Kansas exports jumped 34 percent to nearly \$3 billion as grain and livestock exports increased. Kansas was the leading exporter of hides and skins (\$323 million), and second in wheat (\$854 million), and livestock and meat products (\$731 million). Minnesota moved into the seventh position as exports increased 72 percent, more than any other State, to \$2.4 billion. Expanded feed grains (\$791 million) and soybean (\$640 million) exports accounted for most the gain.

Washington, Indiana, and Arkansas rounded out the top 10 with exports of \$1.8 billion, \$1.7 billion, and \$1.6 billion, respectively. Washington exports gained 8 percent on increased wheat (\$449 million) and vegetable (\$436 million) exports. Indiana exports rose 5 percent on increased feed grains (\$722 million) and wheat (\$34 million), but lower soybean (\$615 million) exports offset some gains. Arkansas remained the 10th leading State as exports rose 36 percent on increased rice (\$458 million), cotton (\$312 million), and poultry (\$311 million). Arkansas was the leading rice and poultry exporter.

Four States that were not top 10 exporters led in individual commodities. North Dakota was the leading wheat and sunflowerseed exporter at \$932 million and \$186 million, respectively. North Carolina was the leading tobacco exporter with sales of \$574 million; Wisconsin was the leading exporter of dairy products at \$165 million; and Georgia was the largest exporter of peanuts and products at \$129 million.

### Methodology

The Economic Research Service estimates State export shares based primarily on production share of the commodity. The estimated export value for each State should not be interpreted as actual measure-

ments of a State's exports. An agricultural commodity is likely to pass through several States before being exported, little data exists on shipments between States, and the State origin is lost as commodities move from farmgate to port.

The estimates are based on the National Agricultural Statistical Service's (NASS) crop production and livestock production and slaughter estimates. In some cases, supplemental data such as the Census

of Agriculture, 1992 and the Department of Commerce's estimates for Exports from Manufacturing Establishments: 1990 and 1991 were used to estimate and adjust export shares. The data for 1990-1993 was revised to reflect revisions in production data, and updated Census of Agriculture and Exports from Manufacturing Establishments data. (*Joel Greene, Trade Analysis Branch, 202-219-0816*)

Totals may not add due to rounding.

1/ Mainly confectionery, nursery and greenhouse, essential oils, beverages, exc. juice, and other miscellaneous animal and vegetable products.

## INDEX OF APPENDIX TABLES

Table	Exports	Page
A-1	U.S. agricultural exports: Quantity and value by commodity . . . . .	A-2
A-2	U.S. agricultural exports: Quantity, value, and unit value by commodity and country, October-March 1994/95 and 1995/96, and March 1996 . . . . .	A-5
A-3	U.S. wheat exports: Quantity (1,000 MT) by destination, October-March 1994/95 and 1995/96 . . . . .	A-74
A-4	U.S. coarse grain exports: Quantity (1,000 MT) by destination, October-March 1994/95 and 1995/96 . . . . .	A-75
A-5	U.S. soybean exports: Quantity (1,000 MT) by destination, October-March 1994/95 and 1995/96 . . . . .	A-76
A-6	U.S. agricultural exports: Value (1,000 dol.) by destination, October-March 1994/95 and 1995/96 . . . . .	A-77
<b>Imports</b>		
B-1	U.S. agricultural imports: Value (1,000 dol.) by country of origin, October-March 1994/95 and 1995/96, and March 1995 and 1996 . . . . .	B-1
B-2	U.S. agricultural imports: Quantity and value by commodity . . . . .	B-2
B-3	U.S. agricultural imports: Quantity, value, and unit value by commodity and country, October-March 1994/95 and 1995/96, and March 1996 . . . . .	B-5
<b>Prices</b>		
C-1	Foreign currency units per U.S. dollar . . . . .	C-1
C-2	Domestic and foreign wheat prices . . . . .	C-2
C-3	Corn, sorghum, rice, and cotton prices . . . . .	C-2
C-4	U.S. and northern European soybean and product prices . . . . .	C-3
C-5	U.S. import prices . . . . .	C-3

Appendix table A-1--U.S. agricultural exports: Quantity and value by commodity

# ERS AutoFAX

Another Service for Users of

ERS Information and Data

---

Timely information and data from ERS are as handy as your fax machine! A call from your fax to the ERS AutoFAX gives you immediate access to documents covering crops and livestock, rural affairs, farm sector economics and many other topics. Enter your selections using the instructions below and AutoFAX will fax these documents to you, **free**, in the same call!

## How to use AutoFAX—

1. Use the handset and Touch Tone keypad attached to your fax machine.
2. Call 202-219-1107 and listen for the voice prompts.
3. Enter document ID number 0411 and confirm when prompted.
4. Enter # to complete your selections.
5. When prompted, press the "start" button on your fax machine and hang up the handset.
6. In moments, the 0411 "help" document will be on its way to you with information on the contents and use of AutoFAX.

Available now, ERS AutoFAX is online 24 hours a day, 7 days a week for your convenience.
